

## DELIVERING THE RIGHT MESSAGE

### FLEXIBILITY

CronLab offers several anti-spam solutions:

- Light 1100 hardware appliance: A low cost solution for companies with up to 70 users.
- Light 1150 hardware appliance: As Light 1100 plus Email Attachment Saver & a larger hard drive.
- Pro 2000 hardware appliance: A powerful and cost efficient solution for mid-sized companies.
- Larger appliances are tailor made to suit the customer's specific needs and requirements.

- Hosted: A scalable solution where the spam doesn't even reach your network.

### POWER

CronLab's products are based on thoroughly tested and secure Open Source software. This gives you access to state of the art protection.

### PLUG AND PLAY

Install your appliance in only 10 minutes or point the domain straight to CronLab's Hosted Solution!

### DELIVER GENUINE EMAILS

Be impressed about the rates of spam stopped, as well as the lack of false positives trapped. Quarantine functionality and learning capabilities further improves accuracy over time. Administrators can search through all emails up to 30 days old.

### FULL CONTROL IN YOUR HANDS

The powerful administration interface allows you full control over your appliance.

### THOROUGHLY TESTED\*

## EMAIL ATTACHMENT SAVER

A powerful add-on to send large files as email attachments

- **Using a standard format** - email; no training or extra programs required
- **Saves network bandwidth** - avoids bouncing emails
- **Abolishes user frustration** common when trying (and failing) to transfer large files
- **Handles files up to 2GB**
- Available on hardware appliances as well as hosted solution

## OUTGOING FILTER

Send emails securely, from anywhere

- **Availability:** Ensure safe delivery of emails no matter where you are. Works on all networks with all email servers and clients, including mobile phones
- **Alarms:** Automatic alarms to administrator if a computer starts sending out spam or viruses
- **Security:** All communication is handled through strong TLS or SSL encryption
- **Prevents blacklisting:** Minimize risk of your domain being blacklisted as spam and viruses are removed before they reach the recipient
